

For a short period of time, a slow typing issue came up for a limited number of users early on with version 6 of Palm-Tech. The issue would cause text entry in a Note to show up slowly on screen as more text was entered.

Resolving the Slow Typing Issue

This issue was caught and fixed shortly thereafter. The fix was included in an update for version 6 and therefore if you are experiencing this issue, simply download the latest update for Palm-Tech. You can download the latest update for Palm-Tech from here: http://www.palm-tech.com/support/latest_update.php

To check what version you are currently running, simply open an inspection in Palm-Tech and click on Help > About Inspector.

If you need help running the update, please see our How To on Installing the Latest Update Here:
